

## I. AMENDMENTS TO THE SPECIFICATION

Please replace the title of the application with the following title:

-- ~~SYSTEM AND METHOD OF HANDLING A WEB SERVICE CALL~~—

The new title is:

METHOD OF HANDLING A WEB SERVICE CALL

Please replace the abstract with the following abstract:

--A ~~system~~ method for handling a web service call by clients in a communication network is disclosed. The ~~system~~ method comprises ~~a client requester for issuing client requests to call a web service from a client requester. The client requests may comprise at least one client request to call a web service.~~ The ~~system~~ method also comprises registering the client request to a callback web service within a callback web service, and that is coupled to the client requester for registering the at least one client request to call a web service and for invoking the called web service. A response web service is coupled to the callback web service for receiving a response to the at least one client request to call a web service and is also coupled to the client requester for delivering the response when a client request to obtain the response is issued from the client requester.--
